DESCRIPTION

Eliminate the guesswork involved in troubleshooting Notebooks that fail to boot!

The ELK-POST-Parallel is a 2.5' x 2' convenient, easy to use P.O.S.T. (Power On Self Test) monitor parallel adapter. The ELK-POST-Parallel may be used to view POST codes generated by the system BIOS in any computer whose P.O.S.T. routine outputs results to the parallel printer port address. Simply plug the ELK-POST-Parallel into a parallel port and power the system on. POST codes are displayed on the 7-segment LCD display, eliminating the need for a code decoder. Connectors on both side of the ELK-POST-Parallel ensure a viewable display. The ELK-POST-Parallel helps greatly reduce or eliminate the guesswork involved in troubleshooting systems, especially for Notebooks, that fail to boot. The ELK-POST-Parallel is a "must have" for any technician.

SPECIFICATIONS

Small and Lightweight

Convenient **2.5' x 2'** in size and only weighs 1.25 ounces

Digital LCD Indicators for Every P.O.S.T. Code Error

The ELK-POST-Parallel provides the user with visual digital indicators for identifying every P.O.S.T. error code.

Displays POST Codes that are Output to Parallel Port

Supports Most Major BIOS Manufacturers

The ELK-POST-Parallel comes with a user friendly manual that describes error codes from all major BIOS manufacturers including AMI, AWARD, IBM, COMPAQ, PHOENIX and more...

Also available

ELK—PCI-POST-Serial equipped with the same functions as the ELK-PCI-POST3.3 but can simultaneously display both port 80 and 81 data on dual 7-Segment displays, capable of outputting data through a on-board serial port, and much more.

ELK-PCI-POST-I2C Adds output capability via a on-board I2C Bus. Also capable of monitoring Sleep Mode 3 volt auxiliary.

ELK-ISA-POST - ISA Version of ELK-PCI-POST
